BRANDS WE USE FOR OUR PROJECTS

SIEMENS **rexroth** **FESTO** **Schneider**
A Bosch Company Electric

Knowledge

Our qualified technicians and engineers possess knowledge and certifications from leading brands such as Siemens, Allen Bradley, and more.

Services

Turnkey

Discover our turnkey system for all your projects, offering engineering, panel building, assembly, and automation.

Service 24/7

We have qualified technicians available to resolve electrical equipment and automated system faults.

Retrofitting

Experience in renewing machinery, injection molding, press, power generation, and other technologies. Upgrade your machine's technology and improve your processes.

BRANDS WE COMMERCIALIZE

rexroth
A Bosch Company

Services

Servo & Proporcional Valve Repair

We repair Moog, Rexroth, Vickers servo and proportional valves, among other brands.

Service 24/7

Technical Service In-Company. Disassembly and repair of hydraulic components, cylinders, valves, motors, pumps, etc. In-situ hose change and manufacturing. Detection and solution of faults and hydraulic oil leaks. 24/7 emergencies. Equipment maintenance, desilting, tank limping, Seal change and recalibration of hydraulic equipment.

Repairs

Repairs and guaranteed certified. Hydraulic pumps – all brands. Proportional valves and servo valves Rexroth - Moog - Vickers. Directional, pressure, flow valves – all brands. Hydraulic cylinders – Seal replacement (custom made if non-standard) – Chrome plating – Honing – Parts manufacturing.

Hoses & Spare Parts

We commercialize a wide variety of brands: Rexroth - Eaton - Parker - Vickers. Wide range of products and spare parts. Hydraulic filters – Elements – Pumps – Motors – Valves – On-site hydraulic hoses. Ask about the component.

03 INDUSTRIAL TRAINING

Our Courses

PLC & Industrial Automation

Open to the general public, full-time employees, freelancers, and independent workers with knowledge of electricity (industrial or electronic), who wish to train in the field of P.L.C. programming and industrial communications, to apply this knowledge to companies that are today governed by this technology.

Pneumatics & Electropneumatics

Target Audience: This technical training proposal is oriented towards personnel from the production, maintenance, and engineering areas of various industries, covering all aspects concerning modern industrial automation.

Industrial Hydraulics

Intended for technical and non-technical personnel wishing to professionalize their knowledge and/or enter the industrial sector/mobile machinery. The training in Hydraulics I will provide participants with tools for the identification of hydraulic components, having notions about the functioning and maintenance of hydraulic components.
